

New NC gun law

Letter to the editor, [Brunswick Beacon](#), 03.16.23

I was concerned to hear that the pistol-permitting law was passed by both NC Senate and House to remove the sheriffs from any control. The argument was that it took too much of their time and some didn't want to participate in gun control. Is that ironic?

The legislators reasoned further that the National Laws for Background Checks would prevail so it is not needed when there's a person-to-person pistol sale. This is so wrong in the current news of more than daily multiple shooting. Where is common sense and reason?

I must raise my voice in protest.
